BlueStone Properties Launches Downtown London's Only Level 3 EV Chargers

- BlueStone has installed two Level 3 chargers in downtown London, expanding fast-charging access and helping advance the city's sustainable transportation goals.
- Featuring 180 kW outdoor and 120 kW indoor chargers, drivers can get a major battery boost in under 30 minutes with 24/7 availability, competitive pricing, and mobile payment options.
- Open to all EV drivers at 130 Dufferin Avenue, the chargers are listed on PlugShare, Google Maps, and more, with nearby restaurants, cafés, and Victoria Park making charging time easy and enjoyable.

LONDON, Ontario - BlueStone Properties is proud to announce the installation of two public Level 3 (DC fast) electric vehicle chargers located in downtown London, a major step forward for the city's EV infrastructure. Strategically located at 130 Dufferin Avenue, this project expands downtown's fast charging capacity, helping close the EV charging gap and supporting London's sustainable transportation goals. Equipped with 180 kW outdoor and 120 kW indoor chargers, the new stations deliver ultra-fast charging power for all EV makes and models. Drivers can now enjoy a significant battery boost in under 30 minutes.

The chargers are open to the public and offer competitive rates with multiple payment options including Apple Pay, Google Wallet, and standard credit and debit cards. The chargers are available 24/7, with 99% uptime, real-time monitoring, and rapid-response maintenance to ensure a reliable and seamless experience.

BlueStone has made the chargers easy to find by listing them on PlugShare, Google Maps, ChargeHub, and the Noodoe EV OS app, along with clear on-site signage and pavement markings.

This project reflects BlueStone Properties' commitment to sustainability and Canada's low-carbon transition. By boosting London's EV network, BlueStone hopes residents, commuters, and visitors embrace electric mobility while building a more connected, forward-thinking city.

"By bringing Level 3 chargers to downtown London, we're not just supporting EV drivers, we're helping build a more sustainable and accessible future," said Jaclyn Bierbaum, Executive Vice President at BlueStone Properties. "This is another step toward our company vision of Building Better Lives and Better Communities Through Better Properties."

Natural Resources Canada's Zero Emission Vehicle Infrastructure Program (ZEVIP) supported the installation of the EV charging stations with \$150,000 in funding.

"Through this project, Canada is delivering practical on-the-ground solutions to improve EV charging availability. Investments like this are how we build a cleaner, more secure and more competitive economy," says the Honourable Tim Hodgson, Minister of Energy and Natural Resources.

"The Government of Canada is ensuring that Canadians have readily available charging options, wherever they go. We are pleased to invest in building EV charging stations for drivers right here in London, and across Canada as they live, work, travel, and play," says Peter Fragiskatos, Member of Parliament for London-Centre and Parliamentary Secretary to the Minister of Immigration, Refugees and Citizenship.
